PROFESSIONAL EXPERIENCE

Naval Postgraduate School, Dudley Knox Library Libraries (June 2017 – present)
Monterey, California
Administrative faculty appointment (AD-09)

>   **University Librarian (Acting)** (May 2018 – March 2019)
>   In this role I served as the chief administrative officer of Dudley Knox Library (DKL) which includes the library, Graduate Writing Center (GWC), and Thesis Processing Office (TPO). In this role I was responsible for formulating, implementing, and overseeing policies, services, programs and information technology that supports the research, teaching, and learning needs of NPS faculty, students, and staff in both residential and distance learning programs. I managed a complex budget and administered the library's financial and human resources. I also served as a member of NPS's senior leadership team.
>
>   Major responsibilities include:
>   - Supervising the director of the GWC and TPO, library department heads, and librarians in charge of NPS's institutional repository and restricted resources collection (8 direct reports. About 30 employees along with 15 contractors work in DKL, GWC, and TPO).
>   - Optimize, prioritize, and oversee a complex annual budget of approximately $7.5 million (DKL, GWC, and TPO combined).
>   - Collaborate with internal and external stakeholders to support graduate-level teaching, learning, and research.
>   - Represents the library and its expertise and capabilities across NPS and externally
>   - Continue to perform the functions of Associate University Librarian.

Specific accomplishments responsibilities include:
- Oversaw the successful execution of the FY18 budget.
- Advocated for and received an additional $100,000 in FY18 end-of year funds from NPS's Graduate School of Operational and Information Sciences (GSOIS) to purchase scholarly materials.
- Prepared and presented DKL's FY19 budget request which led to an overall $250k budget increase.

Associate University Librarian (June 2017 – present)

Responsible for administering Dudley Knox Library (DKL) operations and for formulating and implementing library information policies, programs, services, manpower, and associated technologies that support the Naval Postgraduate School on-campus and distributed instructional and research programs. My scope of duties includes supervising library staff, managing budgets, manpower, and physical facilities. Additionally, I lead the assessment of DKL's contributions to teaching, learning, and research.

Major responsibilities include:
- Supervising library administrative and fiscal personnel as well as the Head of Metadata Services, Head of Library Systems, and the digital and special collections librarian
- Manage the library budget (approximately $7.5 million in FY21). This includes serving as an Authorizing Official (AO) for DKL and NPS's Graduate Learning Center's purchasing and travel.
- Manage work force and training programs.
- Manage the library's physical facilities.
- Lead the collection and presentation of metrics used to assess the Library's contributions to student learning and faculty productivity. This includes responding to high priority requests form the Navy and NPS leadership and preparing DKL's Association of College and Research Libraries (ACRL) Academic Library Trends and Statistics / Integrated Postsecondary Education Data System (IPEDS) survey annual reports.
- Representing the library by serving on campus and outside committees.

Specific accomplishments include:
- Successfully lobbied for approximately $800,000 additional FY19 end of year funds to purchase scholarly content and to put towards GWC service contract.
- Lead administrator on the Dudley Knox Library's response to COVID-19.
- Metadata/Library lead on NPS's Athena project. (Athena will provide a repository of knowledge/content that includes discovery, communication, and team collaboration tools and a matching function that will match the needs of the military with the abilities, resources, and interests of its available researchers.)
- Lead on various renovation projects including new workspaces for Library Systems and Metadata Services departments, the Graduate Learning Center, and a new lactation room.
- Serve as PI (with Eleanor Uhlinger as Co-PI) for a NPS Foundation Seed Grant ($10,000) for planning a "Research, Teaching & Learning Hive: Innovation Hub." (ongoing)
- Volunteered to be part of the NPS Defense Performance Management and Appraisal Program (DPMAP) Training Cadre.

University of Alabama, University Libraries (April 2015 – May 2017)
Tuscaloosa, Alabama
Faculty appointment at rank of Associate Professor

Associate Dean, Library Technology Planning and Policy (April 2015 – December 2016)
Responsible for the information technology operations of The University of Alabama Libraries. These duties included planning and executing a strategic vision for library technology that supports the mission and goals of The University of Alabama. As the administrative head of library technology, I was responsible for the management of all aspects of the area that includes Area Computing Services, Digital Services, Integrated Library System and E-Resource Management, Web Infrastructure and Application Development, and Web Services. I was also responsible for managing the annual budget for all technology hardware and software application expenditures (over $525,000 annually, not including personnel). I also participated in the overall administration of the University Libraries as a member of the Libraries Executive Committee.

Major responsibilities include:
- Responsible for approximately 25 FTE in the following areas (up to 8 direct reports):
    - Area Computing Services: This unit provides desktop, network, and software support for over 700 public and staff PCs and Macs.
    - Metadata and Digital Services: This unit is responsible for the digitization and preservation of unique content from the Libraries Collections and works with other digital library initiatives.
    - Integrated Library System and E-Resources Management: This unit is responsible for managing the integrated library system (Voyager) and enabling remote access and authentication to electronic resources using the EZproxy platform.
    - Web Infrastructure and Application Development Programmers and UNIX system administrator responsible for the technical infrastructure of all websites and web applications. This group manages the locally developed (open source) Acumen digital repository discovery application.
    - Web Services: This department is responsible for managing the University Libraries web presence. They also serve as primary administrators for the EBSCO Discovery Service, LibGuides, and RefWorks.
- Monitor, develop and implement emerging and innovative technology strategies and solutions to ensure that University Libraries meets the changing needs of our users.
- Provide active leadership and direction for the Libraries technology units and personnel in support of the University's accessibility initiative.
- Develop and communicate goals, objectives, plans and policies for technology projects and digital initiatives.
- Maintain a strong cooperative relationship with both internal organizational departments/units, as well as campus technology areas such the Office of Information Technology, Faculty Resource Center, Center for Instructional Technology, and other areas of the University concerned with information technology policy, planning, and implementation.
- Represent the interests of the University Libraries through participation on relevant campus committees as well as state, national, and international organizations.

Specific accomplishments include:

- OLT launched a new library website in August 2015. Between August 15, 2015 and August 15, 2016, page views increased almost 40% compared to the previous year.
- Worked with the dean and other associate deans to expand the Digital Services under the Office of Library Technology into the Metadata & Digital Services department. This involved reassigning faculty and staff who were primarily doing metadata work in cataloging and special collections to the new department.
- Negotiated and implemented a new Service Level Agreement (SLA) with The University of Alabama's Office of Information Technology (OIT).
- Appointed a librarian to be the University Libraries' first technology accessibility liaison and one of the first academic units on campus to have someone assigned the role of technology accessibility liaison.
- Initiated the University Libraries becoming a charter member of the Open Preservation Foundation, becoming the first academic library in the United States to join the leading international organization for digital preservation.
- Created the "Occasional Lecture Series on Library Technology" to help communicate what is being done in the area of library technology at The University of Alabama Libraries and at other research libraries.
- Evaluated various platforms for a new Institutional Repository that will capture and provide access to the Universities' scholarly output including ETDs. This included researching available options as well as installing, configuring, and testing the DSpace repository application.
- Implemented new digital signage to advertise library resources, services, and events.

Interim Associate Dean, Special Collections (October 2015 – September 2016)

I was appointed Interim Associate Dean, Special Collections in addition to my role as Associate Dean, Library Technology Planning and Policy In addition to being the administrative head for Special Collections (approximately 12 FTE). I was also the administrative head of the Music Library for a majority of this time until we implemented a minor reorganization that changed the reporting lines of the Music Library.

Major responsibilities include:

- Appraising administrators in the University Libraries and campus administration of retention issues, especially those relating to digital content.
- Maintaining oversight of all issues relating to gifts as well as University records that are received in digital format regardless of which unity within Special Collections received digital content.
- Ensuring appropriate queues of materials housed in Special Collections are made available to the metadata staff and digitization staff.
- Ensuring that the Dean and Public Relations Officer are informed of all gifts, whether potential or received, and all donor prospects.
- Serve as senior administrator for the Music Library (October 1, 2015 – March 31, 2016).
- Responsible for goal setting and faculty/staff evaluations.

Specific accomplishments include:

- Facilitated the transition from Archivist Toolkit to ArchivesSpace.
- Worked with Special Collections librarians and staff to update various policies and procedures
- Visits to the Hoole Library increased 30% during the 2015/16 academic year compared to the previous academic year. The increase can partially be attributed to increased outreach, marketing, and hosting exhibits and lectures that were of interest to the community.

Associate Professor-Librarian, Resource Acquisition and Development (January 2017 – May 2017)

Responsibilities include database maintenance and complex copy cataloging of music, foreign language (Roman script), and gift materials.

Binghamton University, University Libraries (May 2008 – April 2015)
Binghamton, New York

Head of Library Technology (May 2008 – June 2010)
Assistant Director for Library Technology (June 2010 – October 2010)
Director of Library Technology (October 2010 – April 2015)
Tenure-track appointment at rank of Assistant Librarian (May 1, 2008 – April 30, 2011)
Tenure-track appointment at rank of Senior Assistant Librarian (May 1, 2011 – April 30, 2014)
Associate Librarian with Permanent Appointment (Tenure) (May 1, 2014 – April 12, 2015)

I provided senior level leadership and vision for information technology within the Binghamton University Libraries. I also served as a member of the Libraries' Executive Council, providing strategic direction and administrative oversight for all Library operations to support the research, teaching, and service mission of the University. This role involved forming strategic partnerships with departments outside of the library as well as with organizations outside of the University. I was originally hired in 2008 as Head of Library Technology and was promoted to Assistant Director and then Director of Library Technology in 2010. I earned tenure and was promoted to the rank of Associate Librarian in May 2014.

Major responsibilities include:
- Served as senior administrator for the Libraries' technology department
- Supervise a diverse workforce in a unionized environment that included the Web Services Librarian and Library Systems Specialists. Responsibilities included identifying staffing needs, recruitment, and evaluation of staff.
- Developed and administered a comprehensive technology plan that is integrated with the Libraries' strategic plan.
- Provided leadership for information technologies and digital initiatives and overall direction, administration and management of computer resources, systems, and networking in the Libraries.
- Worked with the Library faculty and staff to research and develop new and innovative technologies and services.
- Administered the Libraries' digital preservation system (Ex Libris Rosetta) and seek to enhance the University's capacity to preserve and provide access to digital documents, publications, images, multi-media materials, data sets, and other digital materials.

- Managed the Libraries' digital initiatives program and digitization laboratory. This included selecting evaluating digital file formats and selecting digitization guidelines based on digitization standards. This, along with my digital preservation responsibilities, included the full lifecycle management of born digital and digitized content.
- Responsible for the Libraries' ILS (Aleph), discovery layer (Primo), federated search solution (MetaLib), and other production systems and infrastructure including virtualization and cloud-based technologies.
- Collaborated with the university's Information Technology Services and Library Information Commons Coordinator on technology infrastructure in the information commons in all libraries.
- Maintained the Libraries' Linux-based servers (appropriately one dozen servers running Red Hat Enterprise Linux, SUSE Linux, and Ubuntu distributions).
- Ensure that students, faculty, and staff have easy access to the Libraries' electronic resources from within the libraries, on-campus, and remotely.
- Participated actively in applied research and development projects. Directed the development and implementation of various information technology-related projects.
- Monitored technological developments and effective practices in the field via professional literature, vendor contacts, and communication with other libraries.
- Collaborated with and assist Library staff with effective use and troubleshooting of a wide variety of microcomputer, networked and web-based applications.
- Served as liaison to the University's Information Technology Services department; served on University Committees and SUNY-wide initiatives.
- Represented the libraries through participation in local, regional, and national cooperative, outreach, and professional activities.
- Administered various library technology services using Open Source Software. Platforms included, but were not limited to: Archon, EPrints, Koha, Omeka, and WordPress.
- Developed and managed collections and electronic resources for the discipline of Library and Information Science.

Specific accomplishments include:
- Led Binghamton University Libraries' digital preservation initiatives. In this role I implemented and served as project manager for the university's successful implementation of the Rosetta digital preservation. Binghamton University was the first academic library in the world to implement this software. I was responsible for defining objectives and goals for this project. I managed all technical aspects of our digital preservation initiatives and served as project leader for new born-digital and digitized collections as they were being ingested into Rosetta.
- I successfully coordinated the migration of the Libraries' Aleph ILS form a locally hosted server to a Software as a Service (SaaS) (cloud computing) platform.
- Provided leadership for a major renovation of the Libraries instructional classroom / public computer laboratory duel-purpose facility. This included the selection of a new classroom management tool (Faronics Insight), new computers, a new smart board, and new furniture.
- I implemented and managed the operation of the Libraries' digitization laboratory.
- I led the redesign and re-organization of the Libraries' Web site.

- I was the team-leader on the Libraries' Primo discovery layer implementation. In addition to providing leadership, oversight, and management of this project, I was responsible for all aspects of the integration of Rosetta and Primo. I continue to provide leadership to this ongoing initiative.
- Led the project to implement the ContentPro digital library system as one of the development partners with Innovative Interfaces, Inc.
- Elected Chair of Libraries' faculty in 2012.
- Provided leadership and technical expertise for various open source software implementations including Research Project Calculator, Meeting Room Booking System (MRBS), and a group study room reservation system (based on phpScheduleIt).

The College of New Jersey (TCNJ), TCNJ Library (January 2005 – April 2008)
Ewing, New Jersey

Systems Librarian (Tenure-track appointment at rank of Librarian II)
Administered all aspects of TCNJ Library's information technology operations. This included serving as the Library's Web master and partnering with the College's Information Technology department to provide high quality, advanced technology to students, faculty and staff. I also was responsible for the Library's Web site and managing the Library's automation system (Voyager).

Major responsibilities include:
- Managed the Library's automation system (Voyager). This included, but was not limited to, installing and troubleshooting staff modules, configuring the Web-based OPAC (Ex Libris WebVoyáge), scheduling and performing upgrades.
- Implemented and administrated the Ex Libris Voyager Inter-Library Loan (ILL) module.
- Served as the Library's liaison for the Administrative and Academic Information Technology budgets.
- Served as the liaison between the Library and the Information Technology department.
- Created custom reports using SQL*Plus and Microsoft Access.
- Implemented and maintained New Books List search function in Voyager.
- Provided general and specialized reference services.
- Created and maintained Library's Web pages.
-

Specific accomplishments include:
- Successfully planned and supervised the information technology aspects of the move to a brand new library building. This included planning for the physical migration of approximately 100 computers and peripheral equipment into new library building as well as ensuring the wired and wireless networking and other technological infrastructure was installed and operating appropriately. This project required close coordination with TCNJ physical facilities and information technology departments.
- As co-chair of Library Web Page Committee, I led the redesign of the TCNJ Library Web site and WebVoyáge user interface.
- Developed and maintained RSS feeds of new library acquisitions based on subject.
- Received IT mini grant ($2000) for Fall 2007 semester to evaluate VuFind.

- Served as project team member for "Shared Open Source Library System Planning" grant ($24,417) funded by the Institute of Museum and Library Services' 2007 National Leadership Grants for Libraries program.
- Partnered with Modern Languages Librarian on creation and maintenance of "Library 2.0" Subject Guides.
- Developed Firefox Web browser search extensions that allowed users to search the library catalog directly from Firefox.

Rider University, University Libraries (April 1998 – January 2005)

Lawrenceville, New Jersey

UNIX Administrator/Library Systems Manager

Administered all aspects of the Library's UNIX servers and the Libraries' automation system (Voyager). I was also responsible for the maintaining all public and staff computing and managing the Moore Library Computer Lab / Electronic Classroom.

Major responsibilities include:
- Managed all technical aspects of the Libraries' automation system (Voyager). This included installing and trouble-shooting staff modules, configuring the Web-based OPAC, scheduling and performing upgrades, and creating custom reports using SQL and Microsoft Access.
- Managed the Moore Library Computer Lab / Electronic Classroom (including technical and staffing aspects)
- Hired, trained, and supervised part time and student workers working in the computer lab and performing other library systems-related tasks.
- Served as Web Master for the University Libraries.
- Served as liaison between the Libraries and the Rider University Office of Information Technology.
- Served as systems administrator for all aspects of the Libraries' UNIX (Solaris) and Linux servers. Also responsible for providing secondary support for the Libraries' Novell servers.
- Provided hardware and software support for approximately one hundred staff and public use computers in two libraries.

Specific accomplishments include:
- Coordinated all technical and systems-related aspects of Westminster Choir Colleges' Talbott Library migration to its first integrated library management system.
- Led the implementation of a new computer lab in the Moore Library. This included installing all computers and software as well as planning for facility needs (electricity, networking, cooling) and staffing.
- Created a new server room out of an old storage room. This project included all aspects of planning for security, remote management, electricity, networking, and air conditioning.

- Served as Project Director of "Implementing Z39.50 and WebPac Technology" grant ($25,000) (1999 – 2000).
- Substantially increased the number of computers available to library patrons throughout the Libraries.
- Implemented new technological offerings including the creation of new subject guides using LibData (an open source Web based application for subject pathfinders).

Highland Park Public Library (May 1997 – August 2003)
Highland Park, New Jersey

Reference / Systems Librarian (May 1997 – December 1997, April 1998 – August 2003 part time; January 1998 – April 1998 full time)
Provided information technology, reference, and collection development services in a busy medium-sized public library setting.

Major responsibilities include:
- Provided reference services to patrons of all ages in a public library setting.
- Installed, upgrades, and evaluated computer hardware and peripheral equipment.
- Evaluated and implemented computer security procedures and software.
- Provide training and assistance on the use of library databases and computer applications.
- Collection development of audio-visual collections and information technology materials.
- Collaborate with Libraries of Middlesex Automation Consortium (LMxAC) on maintaining computers, networks, integrated library system clients, and related software.

Specific accomplishments include:
- Provided consulting service for migration to a new stand-alone integrated library system (previously the library had automation services provided by a county-wide consortium).
- Designed and implemented a new Web site for the library.

Rutgers University, Data Center Operations, Computing Services (September 1989 - January 1998)
New Brunswick, New Jersey

Computer Operator (1995 – 1998 full time; 1989 – 1995 part time)
Major responsibilities include:
- Operated IBM 9672 Mainframe, Sun Microsystems computers, and Xerox laser printers.
- Installed, upgraded, and maintained UNIX (Solaris) software.
- In absence of shift supervisor, supervised other full and part time staff.
Specific accomplishments include:
- Programmed, designed, and maintained the department's first Web site.
